Re: Kaiser Aluminum & Chemical Corp.  
Bonneville Plant Reclamation Plan  
#43-045-002  
Tooele, County, Utah

Dear Mr. Lallman:

Our staff appreciated your efforts in describing the phases of your work during our tour of the Bonneville Plant operation. Historically, the Bonneville Plant has been of value to the State of Utah and we hope it will remain so in the years to come.

As we discussed during our visit, it seems that the only reclamation possible on your ponds and mill will be a general clean-up of the areas involved. Please return to us as an addendum to your reclamation plan, a statement similar to the following:

"Reclamation on the ponds and mill, when eventually abandoned, will consist of removing or burying extraneous debris such as scrap metal, abandoned and unusable lumber, or junk equipment."

After receiving your plan addendum we will publish notice as required by the Act, and set an estimate of surety needed for reclamation. When thirty (30) days have passed after the last date of publications and the surety agreement consummated the operation will have fulfilled the requirements of the Mined Land Reclamation Act.

Please contact me if you have any questions or are in need of assistance in this matter.

Very truly yours,

Ronald W. Daniels  
Coordinator of Mined  
Land Reclamation
